

a new kind of space,  
a better way to live

Why you'll love your Series 9500 Bi-Fold Door

## the Series 9500 Bi-Fold Door

change the space around you

Outdoor living areas have evolved from traditional patios to bold, reimagined spaces that attach to the home and blend the indoors with the outside. These new indoor/outdoor living rooms expand space, frame beautiful views, and let the sunshine and fresh air in. In short, they help us live better.

Western Window Systems is passionate about indoor/outdoor living. Our Series 9500 Bi-Fold Door is more than just a patio door – it's an architectural element that changes the space around you beautifully and efficiently for years to come.

## designed to fit the way you live

With the Series 9500 Bi-Fold Door, you can connect interior spaces with the outdoors in ways that suit your individual style. Freed from a boundary to the outside, the expanded indoor/outdoor area is perfect for entertaining, relaxing with family and friends, or simply welcoming in fresh air and natural light.

The ability of the Series 9500 to completely open up to the outdoors is what makes it so unique. Large folding glass panels operate effortlessly and allow for unobstructed views. A clean, contemporary design makes it visually appealing and able to blend easily with a wide variety of home styles. And since Western Window Systems builds its products to last, you'll be able to enjoy the Series 9500 for years to come.

## luxury meets durability

When you decide on a Series 9500 Bi-Fold Door from Western Window Systems, you're choosing the same high-quality, long-lasting product preferred by architects of luxury homes. Combining exceptional performance with clean, minimal design, its desirability is in the details.

### Here's how we do it:

- ▶ our wide glass panels provide more light and maximize views
- ▶ heavy-duty roller hardware allows our doors to move easily and smoothly
- ▶ thermal, water, air, and structural testing help to protect your home
- ▶ we use only high-quality hardware
- ▶ every door system is built at our headquarters in Phoenix, Arizona

## energy efficiency and sustainability

Our dedication to high-quality door systems extends to energy efficiency and sustainability. When we build a Series 9500 Bi-Fold Door, we utilize materials and resources as effectively as possible. And because our products are built to last, they stay out of landfills longer.

**Plus:**

- ▶ our thermally broken aluminum frames prevent heat transfer and condensation
- ▶ our triple-coat glass reflects heat while allowing light to pass through
- ▶ our door systems are subjected to energy and performance tests
- ▶ we recycle our aluminum and use recycled materials
- ▶ we reduce international shipping costs by making all our products in the U.S.

## a leader in quality, innovation, and service

In 1959, Western Window Systems produced its first glass product in Phoenix. From this simple beginning, we've become what we are today: a recognized leading designer and manufacturer of high-quality door and window systems in North America.

Our legacy of quality manufacturing is based on three core values: excellence, innovation, and partnership. All of our products are built in Arizona using superior materials that promote longevity. Our commitment to innovation has resulted in numerous product awards from the building and remodeling industry. And because we're passionate about actively building relationships, we're at your service via telephone or online.

If you have a question or need more information, contact us at 1-877-268-1300 or through [westernwindowsystems.com](http://westernwindowsystems.com).
